1. Communicate business-related information persuasively and accurately in oral, written, and graphic formats
2. Work in a manner consistent with professional standards, practices and protocols while working effectively with co-workers, supervisors and others
3. Develop customer service strategies to meet the needs of internal and external stakeholders
4. Apply knowledge of the human resources function, marketing function, financial function, operations management to solve real life business problems
5. Utilize research skills to gather, interpret, analyze and evaluate data from primary and secondary resources
6. Apply creative-problem solving skills to address business problems and opportunities
7. Take into account the impact of the economic, social, political, and cultural variables which affect a business operation

8. Demonstrate leadership and management knowledge and skills to assist in the planning, directing, and controlling of an organization

Evaluation

This course is a pass/fail.

Performance Requirements

Welcome to the Integrated Case Competition. We call this an “integrated” case because it will require you to integrate your knowledge of a range of functional areas in addressing the issues in the case and developing a strategy to deal with those issues. The issues are not limited to marketing or accounting or operations or human resources.

You will take the perspective of teams of consultants retained by the client. Your team will be expected to:

1. advise with respect to the strategic direction of the firm
2. provide a thorough and insightful analysis of the company’s current situation
3. recommend any strategic changes that your analysis suggests are needed
4. provide an action plan outlining a timetable and necessary resources for the changes to be made
5. present a professional, polished plan to the clients and be prepared to support your recommendations
