*Three take-home problem sets

**The laboratory component has eight weekly experiments, plus a laboratory examination at the end of the semester. Before each experiment the students need to prepare a prelab in which they summarize the experimental procedure and solve a few related problems. After the experiment is performed the students need to prepare a laboratory report in which they need to use the experimental data and do calculations.

Students intending to transfer to other institutions require a ‘C-’ as a minimum grade. Transfer information on each course is available at the Alberta Council on Admission and Transfers.

In the chemical laboratory, students must use a lab coat and a pair of safety goggles (if you normally wear contact lenses, you should switch to regular glasses for lab work). You should never wear contact lenses in a lab.

Students who do not complete all the required work should not expect to pass the course. Students should consult:
