COURSE OUTCOMES:
The student will be able to:
1. Perform analytical and chemical kinetics experiments using laboratory equipment, and use proper laboratory safety procedures

3. Analyze chemical equilibrium using Le Châtelier’s principle, and perform equilibrium calculations using an ICE table for acid-base equilibria, solubility equilibria, and complex ion equilibria
4. Explain electronic configurations of coordination compounds using Crystal Field Theory, and correlate it with their properties like color and paramagnetic-diamagnetic character
5. Understand how the electrochemical cells operate, calculate their standard potential, and correlate the potential to the ionic concentrations in each half cell using Nernst equation
REQUIRED RESOURCES:

The 9th edition of this textbook is also acceptable.
The old editions of the lab manual are not acceptable.
3. Student Lab Notebook with Permanent Binding; Plymouth, Michigan: Hayden-McNeil, LLC
4. A non-programmable scientific calculator (Sharp EL-531, used for exams, is recommended).
5. Extra long lab coat.

Students intending to transfer to other institutions require a ‘C-’ as a minimum grade. Transfer information on each course is available at the Alberta Council on Admission and Transfers.
In the chemical laboratory, students must use a lab coat and a pair of safety goggles (if you normally wear contact lenses, you should switch to regular glasses for lab work). You should never wear contact lenses in a lab.

Students who do not complete all the required work should not expect to pass the course.

Plagiarism and Cheating
Every student expects to be treated and evaluated fairly in a course. Plagiarism and cheating robs everyone of this right.

No student may submit words, ideas or data of another student or person as his or her own in any writing, project, assignment, quiz, electronic presentation, exam etc. Any work used that is not the student's own must be clearly cited as belonging to someone else. There are penalties for using other's work and not citing it. The Student's Rights & Responsibilities document clearly outlines these penalties and the appeal process.

- No learner can obtain information from another student during an exam.
- No learner can bring unauthorized information (paper or electronic) into an exam or quiz.
- No student can submit work done in another course for grading in this course without the written prior approval of the course instructor.
- No student can submit copyright protected or commercially produced materials as part or all of an assignment without proper citation & permission.
Student Rights & Responsibilities
