

**Power Engineering: Co-op
Third Class**
Year 2, Term 1

PECO 3400 Prime Movers and Auxiliaries

4 credits, 4 weeks, 120 hours

This course covers prime movers, air compressors, refrigeration, and lubrication as identified in the Alberta Boilers Safety Association Reference Syllabus for the second paper of 3rd Class Part B Power Engineering.

Prerequisites: Completion of 3rd class Part A theory or 3A ABSA

Instructors

John Cook (Chairperson)

Office#: BL153

Office hours

As per request from students, instructors are available outside of instructional hours.

Required Resources: (Available at Keyano College Bookstore)

Power Engineering Third Class (Textbook), Part B2 PanGlobal, Edition 2.0, ISBN 978-1-926900-01-8

Power Engineering Third Class (Workbook), Part B2 PanGlobal, Edition 2.0

2007 ASME Boiler & Pressure Vessel Code, An International Guide, Academic Abstract American Society of Mechanical Engineering, 2007 Edition, ISBN 978-1-897461-24-2

Course Outcomes

Upon successful completion of this course, students will be able to:

- Describe and differentiate between the principles, design, auxiliaries and operations of steam and gas turbines including steam turbine condenser systems, internal combustion engines, fired heaters, heat exchangers & cooling towers.
- Explain the operation of cogeneration systems including simple-cycle, combined-cycle, heat recovery generators and start-up procedures of cogeneration & simple-cycle plants.
- Describe the types of compressors in industrial plants including the application of theory, design, auxiliaries and operations.
- Analyze refrigeration & air conditioning systems showing their principles, auxiliaries and operations.
- Apply legislation to evaluate, and recommend corrective actions for, wastewater treatment plants including operations, filtering and separation.
- Describe plant maintenance & administration including record keeping, project management, operation procedures, communication and monitoring requirements.

Evaluation

Students will be graded using percentage scales.

Category	Weight
Section "S" Test	20%
Section "S" Test	20%
"E" Exams	35%
Workbook	15%
Moodle Chapter & Unit Quizzes	10%
Total Grade	100%

*The minimum standard for passing all "S" & "E" exams and the overall course is a grade of **65%**. In addition, a **PASS** mark for completion of six month work experience co-op is required.*

Performance Requirements

Technical training is considered an extension of the workplace in terms of attendance and punctuality. It is expected that students will manage their time in accordance with the published program schedule and will attend all classes. Students shall not exceed four days absenteeism during year one, term one which is the four month theory based training period.

Behaviours of a Successful Student

SKILL Centre Information:

The SKILL Centre is a learning space in the Clearwater Campus where students can gather to share ideas, collaborate on projects and get new perspectives on learning from tutorial staff. A student conference room is available for students to “reserve” for study group purposes. The SKILL Centre is for “support” not to “teach” you course content due to lack of attendance.

	Monday - Friday
Monday to Friday	8:30 – 4:30

Additional evening & weekend tutorial hours will be posted in the Skill Centre or please contact skill@keyano.ca to confirm tutoring availability.

Academic Regulations

Refer to page 26-40 of the Keyano College 2013-2014 Credit Calendar or use this link to view Keyano College's [Academic Regulations](#):

Keyano College Student Rights and Responsibilities:

It is the student's responsibility to read the Student Rights and Responsibility Policy document found in the Keyano College Credit Calendar 2013-2014, pages 36-40. The information contained in this policy should guide the student's conduct while attending Keyano College. Below are a few "Highlights" to note:

Student Rights: The student has the right to:

- reasonable freedom of opinion and expression in the classroom, in assignments, and in exams, where course content allows.
- confidentiality of his/her personal records.
- proper and impartial evaluation of his/her performance and the right to request a re-evaluation within time lines and procedures established by the College.
- freedom from being subjected to physical, verbal, mental, or sexual harassment including any indignity, injury, violence or unfair accusation.

Student Responsibilities: The student has the responsibility to:

- respect the rights of ALL others. Respect is earned.
- refrain from threatening to subject or subjecting any person to physical, verbal, mental, or sexual harassment including any indignity, injury, violence or unfair accusations.
- respect the faculty member's right to determine course methodology, evaluation, right to set deadlines for assigned work, and to establish penalties for failure to comply with deadlines.
- refrain from unduly disturbing, disrupting or otherwise interfering with studies, laboratories, lectures, work or other activities of fellow students or staff.
- know the consequences of plagiarism, fraud, deceit, and/or other forms of academic and non-academic dishonesty.
- not openly share marks and other confidential information/material in the classroom.

Instructor Responsibilities: The instructor has the responsibility to:

- establish, post and enforce classroom ground rules to promote the student learning experience. This may include the promotion and application of electronic devices for learning purposes. If abused, then this privilege may be taken away.
- accommodate students with different learning styles and disabilities.
- be prepared and committed to effective time management and relevance of theory and application.
- be actively available, and maintain a physical presence in the classroom in order to monitor student learning in a timely manner.
- address student concerns encountered with Moodle test bank.
- acknowledge student diversity and treat ALL students with respect. Respect is earned.
- enhance the classroom learning environment by incorporating actively engaging activities, arranging relevant lab/shop tours, utilizing posters/visuals/manipulatives and sharing of relevant experiences. Remind students the classroom reflects a typical work site, thus is not a democracy (i.e. cell phones, breaks, etc.).
- exercise discretion with regards to student attendance and tardiness.
- ensure examinations are fair and align with student learning outcomes.

Teaching & Learning Methodologies

This course is delivered in a classroom setting, supplemented by online testing through iLearn/Moodle; <http://ilearn.keyano.ca> **Please note:**

- iLearn/Moodle will be used for ongoing assessment purposes. Please be patient and bring questions/concerns regarding the test bank to your instructor.
- All quizzes and exams on iLearn will open in a SECURE window. **Any attempts to breach security measures** (i.e. copy, print, screen capture, right clicking, navigation away from quiz/exam window, etc.) will automatically “kick” you out of the quiz. Occurrences of this nature **will be documented and kept on student record, be considered academic misconduct and just cause for disqualification of course completion.**
- iLearn/Moodle quizzes will be released by instructor as per course instruction schedule. Consideration will be given for exam preparation 2 days prior to exams.

This course is also supplemented by **Mentor 3D**; www.mentor3D.keyano.ca which is an online, interactive 3D animation program to support student learning of some program concepts and procedures. Access to this technology is not automatic and requires student registration and password access which may be available upon request to the instructor. Access may take up to 48 business hours to process.

In addition, applicable **lab tours** will be planned to enhance the student learning experience, when opportunities exist.

Specialized Supports & Duty to Accommodate

Disability Support Services: Learner Assistance Program (LAP):

If you have a documented disability or you think that you would benefit from some assistance from a Disabilities Counsellor, please call or visit the Disability Supports Office 780-792-5608 to book an appointment (across from the library). Services and accommodations are intended to assist you in your program of study, while maintaining the academic standards of Keyano College. We can be of assistance to you in disclosing your disability to your instructor, providing accommodations, and supporting your overall success at Keyano College.

Specialized Supports and Duty to Accommodate:

Specialized Support and Duty to Accommodate are aligned with the office of Disability Support Services: Learner Assistance Program (LAP) guided by federal and provincial human rights legislation, and defined by a number of Keyano College policies. Keyano College is obligated by legislation to provide disability-related accommodations to students with identified disabilities to the point of undue hardship.

Please Note: It is your responsibility to contact the Office of the Registrar to **update your contact information** and complete forms related to changes of registration.

Learning Outcomes

1. Describe the support auxiliaries for a gas turbine and explain common operational, control and maintenance procedures.
2. Describe auxiliary support and control systems for steam turbines and explain start-up and shutdown procedures.
3. Explain typical designs, components and operating principles of steam turbine condensers.
4. Explain common designs, major components, operating principles, and arrangements for industrial gas turbines.
5. Explain the operating principles, designs, support systems, and operation of industrial internal combustion engines (ICE).
6. Explain cogeneration and describe common configurations, components and applications.
7. Explain the classification, designs, and operating principles of industrial air and gas compressors
8. Explain the control and system auxiliaries for a typical instrument air system and explain startup procedures for air compressors.
9. Explain the classification and properties of refrigerants and describe the operating principles and components of compression and absorption systems
10. Explain control and safety devices on a compression refrigeration system and explain procedures and equipment to control oil, non-condensables, moisture, refrigerant, and brine.
11. Describe the design, operation, and applications of various types of industrial heat exchangers.
12. Describe the design, components, operation, and applications of direct-fired and indirect-fired natural draft process heaters.
13. Explain start-up and shutdown procedures for an indirect-fired heater.
14. Explain typical components of maintenance and administration programs for utilities and process facilities.
15. Describe designs, operating principles and major components of steam turbines.

Authorization:
