Course Outline

UNIVERSITY STUDIES

ENGG 130A
Engineering Mechanics I
Fall, 2014

3 CREDITS
5 HOURS PER WEEK

INSTRUCTOR: Jean-Pierre De Villiers
INSTRUCTOR: Jean-Pierre De Villiers

PHONE NUMBER: (780) 791-4940

E-MAIL: Jean-Pierre.DeVilliers@keyano.ca

OFFICE NUMBER: S211B

OFFICE HOURS:
Monday 02:00 – 02:50 PM
Tuesday 01:00 – 01:50 PM
Thursday 09:00 – 10:50 AM
Friday 10:00 – 10:50 AM

HOURS OF INSTRUCTION:
Monday 01:00 – 01:50 PM Room 239
Tuesday 02:00 – 02:50 PM Room 239
Wednesday 11:00 – 12:50 PM Room 239 (lab)
Friday 03:00 – 03:50 PM Room 239

COURSE DESCRIPTION:
The ENGG 130 course is an introduction to the fundamental principles of statics, a key field in engineering mechanics. Statics deals with the equilibrium of bodies that are either at rest or moving with a constant velocity. The main topics covered in this course include: force vectors, equilibrium of a particle, equilibrium of a rigid body, structural analysis of simple trusses and frames, internal forces, friction forces, centre of gravity, and moments of inertia.

PRE-REQUISITE(S):
Admission into the engineering program at Keyano College or permission of the Chair.

COURSE OUTCOMES:
The students will be able to:
1. carry out idealization of a physical system, and know how to set up and solve the equations to solve a statics problem.
2. resolve forces in planar and three-dimensional space.
3. draw a free-body diagram of a rigid body and develop the equations of equilibrium.
4. calculate a moment about an axis in 2D and 3D and to reduce a simple distributed loading to a resultant force having a specified location
5. apply equilibrium concept/techniques to solve simple 2D structural problems
6. analyze friction forces.
7. compute the centre of mass for discrete systems and continuous bodies of arbitrary shape in 2D
8. calculate the moment of inertia for a simple planar object.
REQUIRED RESOURCES:

- Engineering notepad for lab
- Lecture Notebook and separate bound notebook for assignments

TOPICS TO BE COVERED:

Please Note:
This course outline may be modified to facilitate unforeseen time constraints. Date and time allotted to each topic is subject to change.

<table>
<thead>
<tr>

</tbody>
</table>

Students intending to transfer to other institutions require a ‘C-’ as a minimum grade. Transfer information on each course is available at the [Alberta Council on Admission and Transfers](http://www.acha.ca).

Students who do not complete all the required work should not expect to pass the course. Students should consult:

[http://www.keyano.ca/Academics/Examinations](http://www.keyano.ca/Academics/Examinations)
IMPORTANT DATES:

<table>
<thead>
<tr>
<th>Date</th>
<th>Event</th>
</tr>
</thead>
<tbody>
<tr>
<td>October 10, 2014</td>
<td>Last day to withdraw with a refund (50%).</td>
</tr>
<tr>
<td>Week of October 13, 2014</td>
<td>Mid-term examination</td>
</tr>
<tr>
<td>November 26, 2014</td>
<td>Courses dropped after this date will be designated “W”. (A withdrawal (W) is not reflected in your GPA)</td>
</tr>
<tr>
<td>December 5, 2014</td>
<td>Last day of classes</td>
</tr>
<tr>
<td>December 8-17, 2014</td>
<td>Final Exams</td>
</tr>

</table>

COLLEGE POLICIES

Equality, Equity and Respect
The Keyano College is committed to providing an environment of equality, equity and respect for all people within the College community. All members of this community are considered partners in developing teaching and learning contexts that are welcoming to all. Faculty, staff, and students are encouraged to use inclusive language to create a classroom atmosphere in which students' experiences and views are treated with equal respect and valued in relation to their gender, ethnic and cultural background, and sexual orientation.

Students should consult:
http://www.keyano.ca/StudentLife/StudentConduct/IndividualRightsPolicy

Plagiarism and Cheating
Every student expects to be treated and evaluated fairly in a course. Plagiarism and cheating robs everyone of this right.

No student may submit words, ideas or data of another student or person as his or her own in any writing, project, assignment, quiz, electronic presentation, exam etc. Any work used that is not the student's own must be clearly cited as belonging to someone else. There are penalties for using other's work and not citing it. The Student's Rights & Responsibilities document clearly outlines these penalties and the appeal process.

- No learner can obtain information from another student during an exam.
- No learner can bring unauthorized information (paper or electronic) into an exam or quiz.
- No student can submit work done in another course for grading in this course without the written prior approval of the course instructor.
- No student can submit copyright protected or commercially produced materials as part or all of an assignment without proper citation & permission.

Student Rights & Responsibilities
Students should consult the Keyano College Credit Calendar or online at:
http://www.keyano.ca/Academics/CreditCalendar

Specialized Supports and Duty to Accommodate
Disability Support Services: Learner Assistance Program
If you have a documented disability or you think that you would benefit from some assistance from a Disabilities Counsellor, please call or visit the Disability Supports Office 780-792-5608 to book an appointment (across from the library). Services and accommodations are intended to assist you in your program of study, while maintaining the academic standards of Keyano College. We can be of assistance to you in disclosing your disability to your instructor, providing accommodations, and supporting your overall success at Keyano College.
Specialized Supports and Duty to Accommodate

Specialized Support and Duty to Accommodate are aligned with the office of Disability Support Services: Learner Assistance Program (LAP) guided by federal and provincial human rights legislation, and defined by a number of Keyano College policies. Keyano College is obligated by legislation to provide disability-related accommodations to students with identified disabilities to the point of undue hardship.

COURSE-SPECIFIC POLICIES

Engineers are problem solvers. If you want to succeed in engineering it is important you learn how to organize your thoughts, to analyze, set up, and solve problems and to experience the often frustrating trials that arise in doing so. The best way to learn and retain knowledge is by practicing; the more problems you attempt and complete, the more experienced and confident you will become.

Engineering is a demanding profession: you must be able to clearly articulate solutions to complex problems in a timely manner. This course will encourage you to develop the work habits and skills necessary to submit clear and concise work on deadline. To reinforce this, keep in mind that sloppy work will not be graded in any component of this course, and late work will also not be accepted.

Teamwork is pervasive in engineering, but this is an activity that takes place among competent peers. Teamwork is a privilege that comes with competence. It is not a way to get by when you lack the skills to do the work yourself. In this course, working in groups can be helpful and is not discouraged, but you must be careful not to use teamwork to coast through an assignment or project; any work that you turn in must be your own (see rules on plagiarism below).

iLearn and Lecture Notes

You are responsible for keeping a complete record of classroom work (lecture notes, interactive problems, classroom exercises) in a proper notebook. Lecture notes are posted to iLearn at the end of each week and do not constitute a complete record of lecture materials.

Attendance Policy

You are expected to attend all lectures, tutorials, and laboratories without exception. Failure to do so may jeopardize your standing in the course; please consult the Keyano College Calendar, also available on-line at http://www.keyano.ca/Academics/CreditCalendar/.

- Valid reasons for absences include illness, medical appointments, and family emergencies.
- You are expected to notify your instructor of your absence by email (preferred) or by telephone on or before the date of the absence; failure to do so will result in your absence being recorded as unexcused.
- You may be required to provide written proof justifying your absence at the instructor’s discretion. Such proof will be required to obtain an excused absence from a quiz, tutorial, lab or exam.

Assignments, Quizzes, and Tutorials (Labs)

Assignments:

It is important to start the problems early and not put them off until the day before they are due. This course uses web-based assignments: you will need to use the Mastering Engineering access kit purchased with your textbook to access the assignments; instructions will be provided in the first lecture. Assignments must be completed via the Mastering Physics web site before the posted due dates; partially completed assignments receive the score achieved before the due date.
You are expected to keep fully worked out solutions to your assignments in a bound notebook; your instructor may ask to see these solutions at anytime, and you should be prepared to produce these solutions when demanded. The best approach is to have your solution book with you during lectures, labs, and tutorials.

You may rework assignments after the due date for practice purposes; this will have no effect on your score.

Accurate sketches and correct free body diagrams (FBDs) are a must and are emphasized in all work. The FBD is the single most important tool for the solution of mechanics problems. The important elements of a good problem-solving technique are:

- correct problem set-up with the assumptions and what is sought,
- correct analysis with appropriate diagrams,
- correct numbers and units, and
- proper interpretation of the solution in both units and directions.

NOTE: missed or incomplete assignments may result in a grade of F for the course.

Exams:

There will be one midterm exam and a final exam in this course. The midterm exam takes place during a lecture period in the week indicated above. The midterm will cover all topics covered up to the date of the exam. The three-hour final exam will take place during the exam period at the end of the term. The final exam is a closed book test where you are expected to demonstrate mastery of the subject. You will be expected to solve a set of problems, some similar to work you have previously done, some more challenging. The assignments and labs are designed to help you prepare for this examination, so make sure you take full advantage of these exercises to prepare for the final.

For all exams, you are expected to know fundamental relations and physical laws. No formula sheet will be supplied, although some hints may be given in some problems where a specialized identity or relation may be required.

Labs/Tutorials: YOU MUST BRING YOUR TEXTBOOK TO ALL TUTORIAL PERIODS

- Two hours per week will be used for laboratory/tutorial exercises.
- Tutorials are designed to help you develop your problem solving skills by having you work out a complete, written solution to a textbook problem or selected reading from your text under the guidance of your instructor.
- Assessment of this component will be based on the quality and clarity of the written solution (getting the correct answer is not a significant component of the assessment).
- Tutorial assignments are due at the end of the tutorial period, unless otherwise indicated.
- You are expected to work on tutorial problems by yourself, though you may discuss your work with your instructor or a classmate; collaborative solutions are not allowed unless explicitly stated by your instructor.

Mentoring

All engineering students will be assigned a mentor (a faculty member). Brief meetings between student and mentor will take place at regular intervals, usually weekly, to help students manage the demands of the engineering program. Typical topics discussed with a mentor include study strategies, guidance, monitoring academic progress, among others.
