Course Outline

Faculty of Arts and Science

ENPHY 131
Engineering Mechanics II
Winter, 2014

3 CREDITS
3+1.5+1 HOURS PER WEEK
4.3 Engineering Units (for U. Alberta)

INSTRUCTOR: Jean-Pierre De Villiers
INSTRUCTOR: Jean-Pierre De Villiers

PHONE NUMBER: (780) 791-4940

E-MAIL: Jean-Pierre.DeVilliers@keyano.ca

OFFICE NUMBER: S211B

OFFICE HOURS:
Monday 11:00-11:50
Tuesday 13:00-13:50
Wednesday 11:00-12:50
Friday 09:00-09:50

HOURS OF INSTRUCTION:
Monday 09:00 – 09:50 Room 239
13:00 – 13:50 Room 239
Tuesday 10:00 – 10:50 Room 239
Wednesday 10:00 – 10:50 Room 239 (Tutorial)
Thursday 14:00 – 16:50 Room 239 (Lab, every other week)

PRE-REQUISITE(S)/CO-REQUISITE(S):
Minimum grade of C- in MATH 100, PHYS 1130, ENGG 130.

COURSE DESCRIPTION:
Kinematics and dynamics of particles, gravitation, work and energy, linear momentum, angular momentum, systems of particles, introduction to dynamics of rigid bodies, accompanied by related laboratory work. The course will also promote the development of a well-disciplined approach to problem solving. This approach will emphasise the rigorous application of the applicable principles, the drawing of accurate free-body diagrams, and the presentation of the results in a clear, logical, and concise manner.

COURSE OUTCOMES:
1. To understand basic phenomena of the physical world: motion of bodies in response to forces (dynamics)
2. To develop problem solving skills ranging from order-of-magnitude estimates to full algebraic/numeric solutions of multi-part problems, often with calculus
3. To develop basic laboratory skills: how to measure, quantify, and analyse physical phenomena; how to discuss and defend experimental results; how to communicate experimental results.

REQUIRED RESOURCES:
- Physics Laboratory Notebook
- Engineering notepad for tutorials
- Lecture Notebook and separate bound notebook for assignments
TOPICS TO BE COVERED:

Please Note:
This course outline may be modified to facilitate unforeseen time constraints. Date and time allotted to each topic is subject to change.

<table>
<thead>
<tr>
<th>Chapter</th>
<th>Topic</th>
<th>Lab</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>12.1-12.4 Kinematics of a particle: - rectilinear, erratic, curvilinear motion</td>
<td></td>
</tr>
<tr>
<td>2</td>
<td>12.5-12.7 Kinematics of a particle: - curvilinear coordinates; projectiles - curvilinear motion: normal/tangential comp.</td>
<td>M1 -Measuring g</td>
</tr>
<tr>
<td>3</td>
<td>12.8-12.10 Kinematics of a particle: - cylindrical components, motion of two particles</td>
<td></td>
</tr>
<tr>
<td>5</td>
<td>13.5-13.6 Force &amp; Acceleration: - Newton's Laws of Motion, coordinate systems</td>
<td></td>
</tr>
<tr>
<td>6</td>
<td>14.1-14.4 Work &amp; Energy: - work done by a force, energy, power, efficiency</td>
<td>M3 - Friction</td>
</tr>
<tr>
<td>7</td>
<td>Rev 1</td>
<td>Family Day; Midterm Review; Midterm</td>
</tr>
<tr>
<td>8</td>
<td>14.5-14.6 Work &amp; Energy: - conservative forces and potential energy - conservation of energy</td>
<td>M4 - Pulleys</td>
</tr>
<tr>
<td>9</td>
<td>15.1-15.3 Impulse &amp; Momentum: - Linear impulse and momentum defined - Cons. of momentum: systems of particles</td>
<td></td>
</tr>
<tr>
<td>10</td>
<td>15.4</td>
<td>Impulse &amp; Momentum: - Collisions</td>
</tr>
<tr>
<td>11</td>
<td>16.1-16.3 Rigid Body Kinematics: - rotational motion - moment of inertia, torque, rotational energy</td>
<td></td>
</tr>
<tr>
<td>12</td>
<td>17</td>
<td>Rigid Body Dynamics: - rolling motion, Newton's 2nd law, work and power</td>
</tr>
<tr>
<td>13</td>
<td>15.5-15.7 Rigid Body Dynamics: - angular momentum, precession</td>
<td></td>
</tr>
<tr>
<td>14</td>

</tr>
</tbody>
</table>

Students intending to transfer to other institutions require a 'C-' as a minimum grade. Transfer information on each course is available at the Alberta Council on Admission and Transfers.

Students who do not complete all the required work should not expect to pass the course.
Students should consult:

http://www.keyano.ca/Academics/CreditCalendar

**IMPORTANT DATES:**

<table>

</table>

**COLLEGE POLICIES**

**Equality, Equity and Respect**
The Keyano College is committed to providing an environment of equality, equity and respect for all people within the College community. All members of this community are considered partners in developing teaching and learning contexts that are welcoming to all. Faculty, staff, and students are encouraged to use inclusive language to create a classroom atmosphere in which students' experiences and views are treated with equal respect and valued in relation to their gender, ethnic and cultural background, and sexual orientation.

Students should consult:
http://www.keyano.ca/StudentLife/StudentConduct/IndividualRightsPolicy

**Plagiarism and Cheating**
Every student expects to be treated and evaluated fairly in a course. Plagiarism and cheating robs everyone of this right.

No student may submit words, ideas or data of another student or person as his or her own in any writing, project, assignment, quiz, electronic presentation, exam etc. Any work used that is not the student's own must be clearly cited as belonging to someone else. There are penalties for using other's work and not citing it. The Student's Rights & Responsibilities document clearly outlines these penalties and the appeal process.

- No learner can obtain information from another student during an exam.
- No learner can bring unauthorized information (paper or electronic) into an exam or quiz.
- No student can submit work done in another course for grading in this course without the written prior approval of the course instructor.
- No student can submit copyright protected or commercially produced materials as part or all of an assignment without proper citation & permission.
Student Rights & Responsibilities
Students should consult the Keyano College Credit Calendar or online at:
http://www.keyano.ca/StudentLife/StudentConduct/AcademicPoliciesProcedures

Specialized Supports and Duty to Accommodate
Disability Support Services: Learner Assistance Program
If you have a documented disability or you think that you would benefit from some assistance from a Disabilities Counsellor, please call or visit the Disability Supports Office 780-792-5608 to book an appointment (across from the library). Services and accommodations are intended to assist you in your program of study, while maintaining the academic standards of Keyano College. We can be of assistance to you in disclosing your disability to your instructor, providing accommodations, and supporting your overall success at Keyano College.

Specialized Supports and Duty to Accommodate
Specialized Support and Duty to Accommodate are aligned with the office of Disability Support Services: Learner Assistance Program (LAP) guided by federal and provincial human rights legislation, and defined by a number of Keyano College policies. Keyano College is obligated by legislation to provide disability-related accommodations to students with identified disabilities to the point of undue hardship.

COURSE-SPECIFIC POLICIES

iLearn and Lecture Notes
You are responsible for keeping a complete record of classroom work (lecture notes, interactive problems, classroom exercises) in a proper notebook. Lecture overheads are posted to iLearn at the end of each week and do not constitute a complete record of lecture materials.

Attendance Policy
You are expected to attend all lectures, tutorials, and laboratories without exception. Failure to do so may jeopardize your standing in the course; please consult the Keyano College Calendar, also available on-line at http://www.keyano.ca/Academics/CreditCalendar.

• Valid reasons for absences include illness, medical appointments, and family emergencies.

• You are expected to notify your instructor of your absence by email (preferred) or by telephone on or before the date of the absence; failure to do so will result in your absence being recorded as unexcused.

• You may be required to provide written proof justifying your absence at the instructor’s discretion. Such proof will be required to obtain an excused absence from a quiz, tutorial, lab or exam.

Laboratory Work:

• Students must keep a proper record of experimental results in a hardcover physics laboratory manual (available at bookstore). **IF YOU DO NOT BRING YOUR LOGBOOK TO A LAB, YOU WILL BE EXCUSED FROM THE LAB.**

• Laboratory attendance is compulsory and no unexcused absences will be tolerated. An unexcused absence will result in a grade of zero for the missed lab and may result in course failure. See attendance policy.
• A properly formatted, laboratory report produced using Microsoft Word and Excel is due at the end of the lab session.

• Pre-lab: you are expected to arrive at a lab having read all advance material (posted on Moodle). A prelab exercise is due before the start of the lab period. If this exercise is not completed by the deadline, it must be completed during the lab period; the remaining time in the lab period will then be available for the experiment.

• A passing grade must be obtained in the lab portion of the course in order to pass the course. Specifically, students must achieve a 50% or greater aggregate score on lab reports in order to avoid an automatic grade of F. If a passing grade is obtained in the lab component, then a grade is assigned a grade based on term work using the weighting given above.

• Laboratory safety is a primary concern.
  
  • WHMIS certification is a prerequisite for participating in labs.
  
  • Any unsafe operation or abuse of laboratory equipment will result in expulsion from the lab and a grade of zero.
  
  • Serious safety breaches may be pursued as an academic matter.

Assignments, Quizzes, and Tutorials

Assignments:

This course uses web-based assignments: you will need to use the Mastering Engineering access kit purchased with your textbook to access the assignments; instructions will be provided in the first lecture. Assignments must be completed via the Mastering Engineering web site before the posted due dates; partially completed assignments receive the score achieved before the due date.

• You are expected to keep fully worked out solutions to your assignments in a bound notebook; your instructor may ask to see these solutions at anytime, and you should be prepared to produce these solutions when demanded. The best approach is to have your solution book with you during lectures, labs, and tutorials.

• You may rework assignments after the due date for practice purposes; this will have no effect on your score.

• NOTE: missed or incomplete assignments will result in a grade of F for the course.

Quizzes:

You are expected to keep current with lecture materials by reviewing your notes, reading your textbook, and making effective use of office hours. To encourage this, there will be weekly, unannounced quizzes consisting of simple conceptual questions. These quizzes may be done via WebAssign or on paper, depending on enrollment (due to limited in-class computing resources).

Tutorials: YOU MUST BRING YOUR TEXTBOOK TO ALL TUTORIAL PERIODS

• One hour per week will be used for tutorials.

• Tutorials are designed to help you develop your problem solving skills by having you work out a complete, written solution to a textbook problem or selected reading from your text under the guidance of your instructor.

• Assessment of this component will be based on the quality and clarity of the written solution (getting the correct answer is not a significant component of the assessment).
• Tutorial assignments are due at the end of the tutorial period.

• You are expected to work on tutorial problems by yourself, though you may discuss your work with your instructor or a classmate; collaborative solutions are not allowed unless explicitly stated by your instructor.
Plagiarism and Cheating

There is a zero tolerance policy in Physics for all forms of academic dishonesty. Plagiarism of any kind, the use of illegal study aids, or the fabrication of experimental results will be dealt with according to Keyano College policy. Specifically for this course:

- **Cheating on assignments and tutorials**: if you are suspected of having obtained assignment solutions through dishonest means, you will be required to convince your instructor that you are able to reproduce any solution on the given assignment or tutorial; failure to do so will result, at minimum, in a grade of zero for the assignment or tutorial.

- **Plagiarizing components of a lab report**: submitting plagiarized material for any portion of a lab report will result, at minimum, with a grade of zero for the lab report in question.

- Attempting to submit a **lab report where data was fabricated** is a major academic offense that goes to your integrity as a scientist. The minimum penalty for such an infraction will be a failing grade for the course.

- **Cheating during an examination (including quizzes)** will result, at minimum, with a failing grade in the course

Repeat offenses will be penalized with, at minimum, a failing grade in the course.
