EMT 400 - Integrated Theory 6 credits 128 hours

This course provides the theory needed for a Primary Care Paramedic. Students integrate theory in the areas of communication, legal and ethical issues, medications, and anatomy and physiology into the essentials of pre-hospital care in order to prepare them for the primary care they will provide as PCP’s.

Co-requisites: EMT 406, EMT 407

EMT 400 – Integrated Theory is comprised of five modules that occur over nine weeks and provide the theoretical foundation needed for a PCP.

1. Anatomy and Physiology Module
2. Communications Module
3. Introduction to Medications Module
4. Legal and Ethical Issues Module
5. Pre-hospital Essentials Module

COURSE TEXTBOOKS:

ANATOMY AND PHYSIOLOGY MODULE

Module Description:
A PCP must have a basic understanding of human body structure and of how the human body functions. This knowledge allows a PCP to make informed pre-hospital assessments and treatment decisions when patients are in distress. This module will introduce the normal functioning components of the human body. The student will apply this knowledge to all assessment and treatment skills.

Module Outcomes:
Upon completion of this module the student will be able to:
1. Describe how the body attempts to maintain homeostasis
2. Describe the organization of the human body
3. Explain the relationship between cells, tissues, organs and systems
4. Recognize the links between structure and normal body function for major organs in each body system
5. Relate anatomy and physiology knowledge to PCP skills
6. Use technical vocabulary and medical terminology related to anatomy in written and verbal communication.

Evaluation:
- One multiple choice exam worth 10% of the overall mark in EMT 400 course.
