

MATH 101: Calculus II

3 Credits, 3 hours lecture, 1 hour tutorial

This course covers applications of integration to lengths, areas, volumes, and masses, inverse trigonometric and hyperbolic functions, methods of integration, polar and parametric equations, vector functions and derivatives.

Prerequisites: MATH 100

Instructor

Instructor Name: Matthew Morin
Office location: S211E
Phone number: 780-791-4831
matthew.morin@keyano.ca

Office Hours

Monday	10:00 – 11:00
Tuesday	10:00 – 11:00
Wednesday	10:00 – 11:00
Thursday	10:00 – 11:00
Friday	10:00 – 11:00

Hours of Instruction

Tuesday	12:30 – 14:00 (S216)
Wednesday	15:00 – 16:00 (S216)
Thursday	13:30 – 15:00 (S205)

Required Resources

Calculus, Early Transcendentals, James Stewart, 8th edition.

Subscription to WebAssign (<http://webassign.net>) is required for the completion of the online homework. At the Keyano bookstore the above textbook comes packaged with a paid subscription.

Course Outcomes

Upon successful completion of this course, the student shall be able to:

- Evaluate integrals using a variety of integration techniques including substitution, integration by parts, trigonometric substitution, partial fractions, and approximation via the Trapezoidal Rule/Simpson's Rule.
- Express and evaluate areas, volumes, surface area, arc length, work, and centroids using integrals.
- Apply integration techniques to solve separable and linear differential equations.
- Plot curves in 2-space and 3-space using parametric equations and use calculus to study the behavior of these curves.

- Represent points, curves, and surfaces in alternate coordinate systems (polar, spherical, cylindrical) and convert back-and-forth to our traditional Cartesian coordinates.
- Apply convergence/divergence tests to study sequences and series.
- Create a Taylor/Maclaurin series representation of a function and employ it to solve problems regarding the function.

Evaluation

Assignments	12% (6% Webassign, 6% Homework Sets)
Quizzes	18%
Midterm Exam	25%
Final Exam	45%
Total	100%

A grade of C- is required for progression or transfer.

Assignments:

In any mathematics course the best way “to learn” is “to do.” The instructor can teach you about the course ideas and demonstrate the mechanics of solving the problems—and can make it look very easy—but growing adept at solving these problems will take a lot of practice and can be a struggle. Although the assignments do not count for a large part of your final grade they are essential in preparing you for the types of problems you will be solving on the exams.

The assignments should be typed or written neatly, stapled, and handed in on the assigned due date. A cover page is not required, but the assignment should show the assignment number, the course number, and the student's name (printed, not written). The problems should be solved in the order given. A late assignment may be accepted, or may incur a penalty.

Although you may work with other students while completing assignments, it is essential that the work you present is your own—see the section on academic misconduct below. Using other students solutions as your own may result in serious academic penalties. If you work with other students on assignment problems, be sure that you know how to solve the problems and that you write out your own solutions in your own words.

Tests:

All tests will be written and are closed-book. No calculators are allowed, nor should they be needed. The topics covered by each test will be described in advance in-class and these details will be posted on Moodle. These tests are meant to test how well you have “mastered” the subject matter. Satisfactory completion of the relevant assignment problems, reading the relevant textbook sections, and studying the course notes is the very minimum amount of work that should prepare you for the types of problems that could appear on a test. However, as tests are cumulative, you may be solving problems that require ideas that bridge across several sections of the course.

Grading System

Descriptor	Alpha Grade	4.0 Scale	Percent	Rubric for Letter Grades
Excellent	A+	4.0	> 92.9	Work shows in-depth and critical analysis, well developed ideas, creativity, excellent writing, clarity and proper format.
	A	4.0	85 – 92.9	
	A-	3.7	80 – 84.9	
Good	B+	3.3	77 – 79.9	Work is generally of high quality, well developed, well written, has clarity, and uses proper format.
	B	3.0	74 – 76.9	
	B-	2.7	70 – 73.9	
Satisfactory	C+	2.3	67 – 69.9	
	C	2.0	64 – 66.9	

Progression	C-	1.7	60 – 63.9	Work has some developed ideas but needs more attention to clarity, style and formatting.
Poor	D+	1.3	55 – 59.9	Work is completed in a general way with minimal support, or is poorly written or did not use proper format.
Minimum Pass	D	1.0	50 – 54.9	
Failure	F	0.0	< 50	Responses fail to demonstrate appropriate understanding or are fundamentally incomplete.

Proposed Schedule of Topics

Week	Dates	Topic	Chapter Sections
1	Jan. 8 - Jan. 12	Area Between Curves, Volumes, Volumes by Cylindrical Shells	6.1, 6.2, 6.3
2	Jan. 15 - Jan. 19	Work/Ave. Value, Integration by Parts, Trigonometric Integrals	6.4, 6.5, 7.1, 7.2
3	Jan. 22 - Jan. 26	Trigonometric Substitution, Partial Fractions	7.3, 7.4
4	Jan. 29 - Feb. 2	Approximating Integrals, Improper Integrals	7.7, 7.8
5	Feb. 5 - Feb. 9	Arc Length, Area of Surface of Revolution, Applications	8.1, 8.2, 8.3
6	Feb. 12 - Feb. 16	Modeling with D.E.'s, Separable Equations, Linear Equations	9.1, 9.3, 9.5
	Feb. 19 - Feb. 23 (No Classes this week!)	Family Day + Reading Days	
7	Feb. 26 - Mar. 2	Midterm Exam , Parametric Curves	10.1
8	Mar. 5 – Mar. 9	Polar Coordinates, Areas and Lengths in Polar Coordinates	10.2, 10.3, 10.4
9	Mar. 12 – Mar. 16	Coordinates in 3-space, Cylindrical and Spherical Coordinates, Review of Vectors	12.1, 15.8, 15.9 12.2-12.5
10	Mar. 19 – Mar. 23	Calculus of Space Curves	13.1, 13.2, 13.3
11	Mar. 26 – Mar. 30 (No Classes on Friday— Good Friday)	Introduction to Series, Series Tests	11.1 - 11.4
12	Apr. 2 – Apr. 6 (No Classes on Monday— Easter Day)	Series Tests	11.5 – 11.8
13	Apr. 9 – Apr. 13	Taylor Series	11.9 – 11.10
	Apr. 16 – Apr. 20	Exam Period	

Please Note:

Date and time allotted to each topic is subject to change.

Performance Requirements

Student Responsibilities

It is your responsibility as a student to contact the Office of the Registrar to complete the forms for

Withdrawal or Change of Registration, and any other forms. Please refer to the list of important dates as noted in the Academic Schedule in the Keyano College credit calendar.

More specific details are found in the Student Rights and Student Code of Conduct section of the Keyano College credit calendar. It is the responsibility of each student to be aware of the guidelines outlined in the Student Rights and Student Code of Conduct Policies.

Laboratory Safety

In the science laboratories, safety is important.

Students must complete the *WHMIS for Students* online training course on Moodle before entering the science laboratories.

Students must comply with the mandatory laboratory safety rules for this course as provided in the laboratory manual. Failure to do so will result in progressive discipline such as a verbal warning, refused entry into the laboratory, or suspension from the College.

Student Attendance

Class attendance is useful for two reasons. First, class attendance maximizes a students' learning experience. Second, attending class is a good way to keep informed of matters relating to the administration of the course (e.g., the timing of assignments and exams). Ultimately, you are responsible for your own learning and performance in this course.

It is the responsibility of each student to be prepared for all classes. Students who miss classes are responsible for the material covered in those classes and for ensuring that they are prepared for the next class, including the completion of any assignments and / or notes that may be due.

Academic Misconduct

Students are considered to be responsible adults and should adhere to principles of intellectual integrity. Intellectual dishonesty may take many forms, such as:

- Plagiarism or the submission of another person's work as one's own
- The use of unauthorized aids in assignments or examinations (cheating)
- Collusion or the unauthorized collaboration with others in preparing work
- The deliberate misrepresentation of qualifications
- The willful distortion of results or data
- Substitution in an examination by another person
- Handing in the same unchanged work as submitted for another assignment
- Breach of confidentiality.

The consequences for academic misconduct range from a verbal reprimand to expulsion from the College. More specific descriptions and details are found in the Student Rights and Student Code of Conduct section of the Keyano College credit calendar. It is the responsibility of each student to be aware of the guidelines outlined in the Student Rights and Student Code of Conduct Policies.

In order to ensure your understanding of the concept of plagiarism, you must successfully complete the online tutorial found on ilearn.keyano.ca. Then print the certificate, sign it, and show it to each of your instructors. Your course work will not be graded until you show this signed certificate.

Specialized Supports

Counselling and Accessibility Services

Counselling Services provides a wide range of specialized counselling services to prospective and registered students, including personal, career and academic counselling.

SKILL Centre

The SKILL Centre is a learning space in the Clearwater Campus at Keyano College where students can gather to share ideas, collaborate on projects and get new perspectives on learning from our tutorial staff.

The SKILL Centre, through a variety of delivery methods, provides assistance in skill development to Keyano students. Assistance is provided by instructors, staff and student tutors. Individuals wishing to improve their mathematics, writing, grammar, study, or other skills, can take advantage of this unique service.
