Electrician Program Supplies (Required for all periods):

- 3-ring binders, dividers, and lined paper
- 6 or 12 inch ruler
- Pens, pencils, highlighters, erasers
- Calculator (with no programmable memory; Sharp 520 is recommended)
- CSA approved safety boots
- Safety Glasses
- Gloves – Mechanix are recommended
- Electrical stencil is recommended

Learning Outcomes
Upon successful completion of Section One – Machines – you will be able to:

1. Perform fourth period math calculations.
2. State the characteristics of alternators and generators.
3. Connect and analyze dc machines
4. Connect and analyze alternators.
5. Connect and analyze synchronous motors.
6. Connect and analyze single phase motors.

Upon successful completion of Section Two – Control and Switching / PLC – you will be able to:

1. Interpret a motor control circuit.
2. Convert between wiring and schematic diagrams.
3. Design and connect controls and switching circuits.
4. Connect and analyze special control circuits.
5. Program, connect and analyze a PLC.

Upon successful completion of Section Three – Fire Alarm Systems & Red Seal Program & Industry Network – you will be able to:

1. Describe the general principles and components of a fire alarm system.
2. Identify and describe fire detection and alarm system regulations.
3. Determine the criteria for the installation of a fire alarm system and for the location of its components.
4. Connect and troubleshoot fire alarm systems.
5. Recognize arc flash hazards in electrical installations.
6. Use Red Seal products to challenge and Interprovincial examination.
7. Describe the role of the Alberta Apprenticeship and Industry Training Board and the network of industry committees that represent the trades and occupations in Alberta.
8. Implement workplace coaching skills when training apprentices.

Upon successful completion of Section Four – Fire Alarm Systems & Red Seal Program & Industry Network – you will be able to:

1. Connect and analyze rectifiers and battery chargers.
2. Connect and analyze controlled rectifiers.
3. Connect and analyze an uninterruptible power supply (UPS) system.
4. Program, connect and analyze variable frequency drives.
5. State the characteristics of a cathodic protection system.
6. Determine the installation requirements for electric renewable energy systems.

Upon successful completion of Section Five – Canadian Electrical Code Part 1 / Application and Safety – you will be able to:

1. Determine the size of conductors and conduit.
2. Apply the grounding and bonding requirements for electrical installations.
3. Apply the rules for installation of cables, raceways and enclosures.
4. Determine protection and control device requirements for electrical installation.
5. Determine the installation requirements for lighting, emergency systems and unit equipment.
6. Determine the installation requirements for communication systems.
7. Determine the electrical requirements for single dwelling feeder and branch circuits.
8. Determine the installation requirements for motors.
9. Determine the installation requirements for capacitors and transformers.
10. Determine the installation requirements for electric welder.
11. Determine the installation requirements for hazardous and special locations.
12. Determine the installation requirements for patient care facilities.
13. Determine the requirements for high-voltage installations.
14. Determine the installation requirements for various electrical applications.
