

Environmental Technology Diploma

Welcome to the Environmental Technology Diploma program at Keyano College.

By enrolling in the ENVT Diploma, you have made a great choice for your future. The Diploma is highly regarded and graduates have moved on to productive and rewarding employment in the region and beyond.

At Keyano College, we pride ourselves on excellent professional instruction and personal attention to student needs. Our small class sizes and professionally equipped science and computer labs will make your educational experience at Keyano a rewarding one. We are here to provide you with a rich learning environment that will help you achieve your academic goals.

Our Faculty are committed to your success; please make the most of the opportunity to engage with your instructors. Your instructors are experts in their subject areas; they can help you excel and provide advice on your academic career.

Since this is a technology-based program, we require that you have a laptop computer for class and lab work; we recommend that you use a modern, Windows-based or MacOS system and avoid tablets since we will require you to install specialized software in certain courses.

Should you have any questions about course registration or technology, or if you have any questions about your program of studies or the College in general, please do not hesitate to contact me directly (marie-france.jones@keyano.ca), or the staff in the Academics Office (academic.office@keyano.ca), to schedule an appointment.

Thank you for making Keyano College your school of choice to begin your university education.

Sincerely,

Marie-Frances Jones, Ph.D
Chair, University Studies and Environmental Technology
